Verkotu. Kansainvälisty. Menesty.

Co-operation with EC and EASME

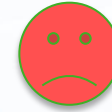

Elina Holmberg
Deputy Head of Horizon 2020 Activities
NCP for Transport and SMEs

Transport: EC

- All communications through the NCP contact, Ioana Adamescu – no direct contacts to call coordinators
- Supported by NCP Network project ETNA 2020
- General information flow is good, and quality of trainings and meetings (mostly organized by ETNA) is also good
- Example: question relating to a scope of a MG-call – the answer took a long time and a couple of reminders, but it was very comprehensive and helpful to the applicant
- ETNA works well, especially towards participating NCPs

SME: EASME

- All communication through... DG RTD? EASME? (don't really know since I haven't received any)
- Main source of information until now have been Twitter, EASME's webpage and other thematic NCPs – i.e. at the same time as the applicants
- Will be strengthened by NCP Network project Access4SMEs
- Example: Applicant's question on SME Instrument Health-related topics 2017, deadlines and budgets
- Example 2: the EC changes the proposal templates or forms without informing the NCPs

Thank you!
