

Examples: Coordination & Support Actions

Good practice

- Very experienced Project Officer, with substantial policy knowledge
- Project Officer provides relevant opportunities to the project team – e.g. to provide input to European Commission activities (consultations, evaluations, other CSAs)
- NCPs/consortium members propose input to European Commission activities
- Project Officer identifies other opportunities – expert reviews

Issues

- Changes of Project Officer during projects
- Project Officer in DG RTD unit not normally associated with administering projects
- Need for communication across European Commission teams
